

ACKNOWLEDGMENT AND CONSENT

In connection with your employment, you may use a Company issued device such as a mobile phone, laptop, or fingerprint reader that provides a method for secure authentication using a fingerprint or face scan. If you choose to authenticate using this feature, the device will create and retain a mathematical representation of your fingerprint or face scan (the “authentication information”), which is encrypted and stored locally on the device in accordance with the device’s specifications. Use of this authentication mechanism is entirely voluntary, and you are free to decline to use the feature or provide your authentication information without any adverse employment action.

Cardinal Health will not sell, lease, or trade the authentication information and will not disclose the authentication information unless required by law, in connection with a legal claim, dispute, or proceeding, in response to requests by governmental regulatory authorities, as the Company may reasonably determine to be necessary or appropriate to protect our rights or the rights of others, to avert loss or harm to persons or property, or in connection with a merger, sale, reorganization, or similar transaction involving all or part of our affiliated companies. For additional information about the Company’s practices regarding the use of authentication information, please contact PatchMyPC@cardinalhealth.com.

* * *

By signing below, you consent to the collection, storage, and use of the authentication information on Company issued devices for the purpose of secure authentication. You acknowledge that you have read this Acknowledgement and Consent, and you agree to the practices described.
